

Seeing Through The Big Lie Behind the War on Terror

Jim Hoffman disproves the official explanation that the Twin Towers and Building 7 collapsed as a consequence of the jetliner crashes and fires -and- provides conclusive evidence of demolition, proving the attack was a manufactured pretext for war

A MULTIMEDIA PRESENTATION FOLLOWED BY AUDIENCE DISCUSSION

The official investigations were farces

- The structural steel was systematically destroyed
- Investigators were unpaid, and barred from Ground Zero
- NIST's investigation avoided the core issue of how the Towers came down

The official explanations are ludicrous

- Rely on alleged phenomena that cannot be demonstrated -- total top-down progressive collapse
- Are contradicted by the evidence
- Ignore engineering history
- Fail to explain total collapses
- Ignore the many evident features of demolition

About 8 seconds into the destruction of the North Tower, 102 minutes after the crash

The Towers' destruction showed the features of controlled demolition

- Sounds of explosions, like rapid gunfire
- Sudden onset, the Towers telescoping into themselves
- Waves of explosions marching down the Towers
- Near free-fall rate of descent
- Rapid growth of exploding dust clouds to 800 feet in diameter in 15 seconds
- Radial symmetry about Towers' vertical axes
- Totality, leaving no large structures
- Thorough pulverization: 200,000+ tons of concrete reduced to fine dust

Simple, non-technical arguments prove demolition beyond a reasonable doubt
